

TRX900

The first wireless microphone transceiver with built-in IFB

Zaxcom is proud to introduce the TRX900 wireless microphone transceiver, a major advancement in the art of professional wireless. By incorporating an IFB receiver into the body of a traditional wireless transmitter both functions are now combined in a package smaller than most transmitters on the market today.

System Features Include:

- ♦ Built-in IFB receiver
- ♦ Digital modulation wireless transmitter
- ♦ Superb audio quality that rivals a hard wire
- ♦ RF remote control of body pack
- ♦ 1.5 hour internal recording with Time Code
- ♦ Digital drop-out protection
- ♦ 2 ms transmission delay
- ♦ 5 hour running time on a single battery
- ♦ Graphic LCD display
- ♦ Integrated Time Code transmission
- ♦ Small and lightweight measuring 2.3" x .69" x 2.1"

No Intermodulation

The Zaxcom TRX900 is intermodulation proof; up to 30 transmitters in the same frequency block can be used together at the same time.

IFB900 RF Remote Control

With the optional IFB transmitter remote control, settings such as body pack audio gain, RF channel and high-pass filter are adjustable - even while the transmitter is in use.

TRX910 Wireless Transmitter

TRX900 Wireless Transmitter

Internal Recording Capability

The TRX900's 1.5 hour internal recording option is perfect for when drop-outs cannot be tolerated. Audio can be recorded, played back and Time Code referenced through commands from the IFB transmitter.

Time Code Receiver / Generator

The TRX900 has an optional Time Code output that is synchronized from the IFB900 transmitter. This output can be used to feed non-linear recorders like the Zaxcom Deva IV & V.
